Computer 2ⁿᵈ Year Short and Long Question	
Chapter No 09 Short Question	
1	What is an identifier?
2	Write any two rules for Identifiers in C Language?
3	What is Standard Identifiers in C Language? Give some example.
4	What is User define Identifiers in C Language? Give some example.
5	What is keywords? Give some example.
6	What is a variable?
7	What is variable declaration?
8	What is Constant? Give some example.
9	What is Numeric Constant? Give some example.
10	What is variable Initialization?
11	What is integer Data types in C Language? Give some example
12	What is Character Constant? Give some example.
13	What is String Constant? Give some example.
14	What is data types? List different categories of data types in C Language.
15	What is Floating point Data types in C Language? Give some example.
16	What is Character Data types in C Language? Give some example.
17	Describe the concept of overflow and underflow. Give some example.
18	What is Cancellation Error in C Language? Give some example.
19	What is Arithmetic Underflow Error in C Language? Give some example.
20	What is Arithmetic Overflow Error in C Language? Give some example.
21	What are operators? List different types of operators in c Language.
22	What is Expression? Give some example.
23	What is Arithmetic operator? Give some example.
24	Describe Unary operators. Give some example.
25	Describe Binary operators. Give some example.
26	Describe Increment Operators. Give some example.
27	Describe Decrement Operators. Give some example.
28	Describe assignment statement. Give some example with syntax
29	Define Relational operators. Give some example.
30	Define Compound operators. Give some example.
31	What are Logical operators? Give some example.
32	Describe Operator Precedence. Give some example.
33	Define Associativity of Operators. Give some example.
34	Describe Comments and their use in C Program.
35	What is type casting? Give some example.
Long Question	
1	What is an identifier?
2	What is a variable? Explain different types.
3	Explain different naming variable rules.
4	What is data types? Explain different categories of data types in C Language.
